Las Vegas, NV 89103
(702) 871-9396

Patent Applied: November 2003

Purpose: Sunglass Shammy is used to clean and dry sunglasses

Design: The Sunglass Shammy is made of fine quality Chamois, a 7 ½ X 7 ½ piece of Chamois is used. Up in the upper right hand corner approximately ½ inch inwards is a grommet. Attached to the grommet is a simple 1 inch metal ring. Attached to the metal ring is a colored plastic snap hook.

Summary of Invention:

The purpose of the Sunglass Shammy is to clean and dry sunglasses in circumstances whereby glasses get wet & dirty on a regular basis. Some Examples for use are: boating, sunbathing, water-skiing, jet-skiing, snow-skiing. At times when your sunglasses get wet and dirty, the Chamois will not only dry the moisture off the sunglasses, but will clean them as well. The main benefit is that the Chamois works best when wet, after you squeeze out all the excess moisture, it can be used over and over again with the same benefit. The hook will allow you to hook the Sunglass Shammy onto your beach bag, jacket, ski bag, life vest, etc. for fast & easy access.

Abstract:

The Sunglass Shammy a convenient way to dry and clean your sunglasses while you can still enjoy the sport of your choice. Instead of using the tail of your shirt or waiting until you have access to a dry beach towel, and then risking a scratch in the glasses lenses, the Sunglass Shammy will dry and clean your glasses anywhere.
